IN BASEMENT OF WORTHEN BLOCK.

CHELSEA.

Hon. H. K. Darling left for Montpelier Monday morning to be absent from town a few days and be present at the opening of the legislature.

Ernest Boyce, who works for E. A. Pitts of East Brookfield, was in town Tuesday and Wednesday.

Elmer Flood of Fitchburg, Mass., is spending a short vacation in town and is the guest of his mother, Mrs. George Lougee, who resides on the West Hill.

Mrs. M. H. Brown returned Tuesday evening from an extended visit with relatives and friends in the West, and was accompanied by her daughter, Mrs. L. L. Welcome of Portland, Me., who comes from a visit to her old home friends.

Charles M. Goodrich, with his wife and son of Northfield, came Sunday for a visit to their former home and are guests of Dr. A. B. Smith and wife and Mrs. May L. Dickinson.

John B. Atwood has returned from Barre Lake where he had been for several days camping.

Charles Dickey of Lowell, Mass., came Saturday evening to join his wife, who for several weeks has been the guest of her sister, Mrs. Charles A. Denmore.

Charles L. Hodges, Esq., of Randolph Centre, general agent for the Lister Fertilizer Company, was in town Tuesday settling with the local agent and contracting for the following year.

In the case of the town of Brookfield vs. Judge C. H. Bigelow which has recently been decided in favor of Judge Bigelow, completely vindicating him of the charges preferred against him, John W. Gordon, counsel for the plaintiff town, has filed with the county clerk appeal papers, thus taking the case to the supreme court.

Walter H. Emery and wife were in East Brookfield Sunday afternoon to attend the funeral of Mrs. Sarah (Hibbard) Newell whose death occurred at the home of her son, Geo. F. Newell, at the advanced age of 80 years. The deceased was one of a family of seven children, one of whom, Eliza Hibbard, now in her 91st year, together with four sons, Everett C., of Bridgewater, Mass., Geo. F. and Silas D. of Brookfield and Dr. H. L. Newell of East Randolph, survive her.

Mrs. Anassa P. Button died Monday evening after a short illness from septicaemia. The case is an especially sad one as she left an infant daughter about 10 days old. The funeral will take place Thursday afternoon on the 1st anniversary of her marriage to Mr. Button, who with the infant survives her. The sympathy of the entire community goes out to the afflicted family in this their sad bereavement.

Dr. J. E. Fish of South Royalton was in town Monday in consultation with Drs. Godfrey and Marshall in the case of Mrs. A. P. Button.

NIGHTS OF UNREST

No Sleep, No Rest, No Peace for the Sufferer from Kidney Troubles.

No peace for the kidney sufferer—Pain and distress from morn to night. Get up with a lame back.

Twinges of backache bother you all day.

Dull aching breaks your rest at night. Urinary disorders add to your misery. Get at the cause—cure the kidneys. Doan's Kidney Pills will work the cure.

They're for the kidneys only—Have made many cures in Barre.

F. A. Beede of East Barre, Vt., says: "I was bothered with a constant lameness across my back and kidneys. I was very restless at night and when I awoke mornings I felt more tired than when I went to bed. I saw Doan's Kidney Pills highly recommended for such troubles and went to E. A. Drown's drug store for a box. They proved to be just what I needed. It was not long before the lameness left my back and I could sleep well nights. Doan's Kidney Pills cured me, and I shall always be glad to tell people of my experience with this remedy."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States. Remember the name—Doan's—and take no other.

NORTHFIELD.

Newall Byam of Randolph called on old acquaintances here yesterday.

W. E. C. Washburn of New York City was called here on Tuesday by the serious illness of his aunt, Mrs. Asa Strong. Mrs. Strong has been failing for the past three months and it is feared that she will never recover from her illness.

Miss Maude Howes is visiting relatives in Middlesex for a few days.

F. M. Kempton was in Barre on Tuesday.

Arthur McCarthy was a business visitor in Montpelier and Barre Tuesday.

C. L. Morse was also a business visitor in Montpelier Tuesday.

Mrs. James Evans, who has been visiting her daughter, Mrs. H. W. Orser, returned to Barre today.

Mrs. William Nichols of Montpelier is in town visiting her son, Hassie Nichols, who is in the fruit and fish business here. Mrs. Nichols expects to come to Northfield soon to remain permanently.

Weston Miner, who has been employed by Emerson Bros. for the past year, has gone to Montpelier where he has employment at his trade as a plumber.

Harry Kendall left yesterday to attend the Tunbridge fair, where he has a fruit stand. W. A. Blake is running his fruit store for a few days during his absence.

J. Kent Morris has re-entered Norwich university to complete his course as a civil engineer. Mr. Morris has been at his home in the South for the last three years.

Frank M. Barney of Springfield, Vt., arrived in town yesterday to make arrangements to attend Norwich university after two years' absence. Mr. Barney when here was an all around athlete, playing back of the line two years ago when Norwich had a winning team. He will make a strong man for this year's team.

Miss Florence Kendall of Granville arrived in town on Wednesday to make the necessary preparations to start a dancing school here next week. Miss Kendall is a teacher of much experience having taught in the surrounding towns for several seasons with success. She intends to have a juvenile class in the afternoon and school for older people in the evening.

One of the large work horses belonging to Samuel Thompson of Northfield Falls dropped dead on the Common Tuesday night when returning from work. There was no apparent cause of its death but it was thought he broke a blood vessel in his head. The horse was valued at \$175.

On Tuesday night about eight o'clock the teams of S. S. Cook and L. A. Avery going in opposite directions collided on So. Main street. Mr. Cook and friend accompanying him were thrown into the ditch and sustained slight injuries. Two wheels of Mr. Avery's wagon were torn for the hub, but he was not hurt.

The Modern Stage Robber.

"One moment," said the affable stage robber. "The lady with the camera evidently wants to take me. Will this do, ma'am?" And he struck a tasty attitude.

The lady smiled. She was a camera fiend, and the chance to humor her pet had quite overcome all thought of danger.

"Look pleasant, please," she said.

The stage robber smiled.

"I will give you the pleasant look of the man who has just taken several thousands from the express box a few hundred in loose change, two bags of dust, eight watches, four diamond rings and an opal scarfpin," he merrily said.

Then the camera clicked, and with a sweeping bow the robber remounted his horse and dashed away—Cleveland Plain Dealer.

Lamps Invented by Chinese.

It is supposed that the earliest lamps were made of the skulls of animals, in which fat was burned. Afterward earthenware vessels were used, then pottery and metals. The invention of lamps, like so many other implements of present day civilization, has been attributed to the Chinese.

Most Elevated River.

The most elevated river in the world is the Desaguadero, in Bolivia. The average elevation above the level of the sea is about 13,000 feet.

Dog Extremes.

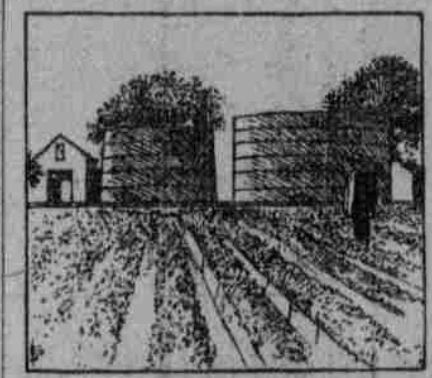

There are dogs standing over three feet high at the shoulder, measuring nearly seven feet from the nose to the tip of the tail and weighing so much as 200 pounds, and at the other end of the scale the little Mexican lapdog is under seven inches in length from nose to tail tip and weighs only a few ounces.

AN IRRIGATING PLANT.

How an Ohio Man Saves His Crops During Dry Weather.

What is said to be one of the most practical and effective irrigating plants in this country is located on Jennings avenue extension, near Cleveland, O., on the farm of Eben Fish. At Mr. Fish's place there is a gravel bed at least 100 feet in depth, making a sub-soil which will absorb all the water which will ever fall upon it. This makes it in some respects an ideal place for irrigation, as it is never too wet for the growing crops, and the only thing to be considered is a plentiful supply of water during dry weather.

There is not a foot of drizzle in use on the farm. This farm has been

STORAGE TANKS.

used for garden crops for many years, but about eight years ago Mr. Fish conceived the idea of constructing an irrigating plant, as he suffered much loss of his crops during seasons of drought. He had never seen an irrigation system, but, being a close student and of an inventive turn of mind, he thought he could bring the water from a nearby stream upon his fields and thus counteract the action of Old Sol on a hot day.

The first step was the construction of a dam across the stream, forming a pond of about one-half acre in extent and about ten feet in depth, says a writer in the Ohio Farmer in describing the plant. This pond has always furnished an ample supply of water, even when the fields were being almost constantly sprinkled in very dry weather. The water is raised to the level of the fields above by a pump, operated by a four horsepower gasoline engine. The pump throws two barrels of water a minute. As the engine requires but little attention, it can be kept running almost continually, and, with the storage tanks, Mr. Fish is able to sprinkle 2,000 barrels of water on his growing crops in a day. The pump is located at the edge of the water, the engine part way up the bank, while the standpipe is up on the level of the fields above.

This standpipe, which is kept pumped full of water to the top, regulates the flow of water throughout the entire system and gives about seven pounds pressure to the square inch on the sprinkling hose. The standpipe is made of fifteen inch sewer pipe, joined together with cement, and is sixteen feet high. Iron pipes, three inches in diameter, run from the pump to the standpipe, and the water is then conducted to the different parts of the fields by a line of four inch sewer pipe, the sections of the pipe being joined together with the joints and laid in a trench two and a half feet underground on an average. This work was done by Mr. Fish and a helper, care being taken to press the cement well into the joints, and an ingenious wiper was made which fitted the inside of the pipe loosely and was drawn past each joint as it was made, thus keeping the pipe free from an excess of cement on the inside.

At intervals of about fifty feet along the pipe line uprights three inches in

THE STANDPIPE STORAGE TANK.

diameter are placed and extend about five inches above the ground, to which may be attached the sprinkling hose. When not in use the opening is made water tight by a round wooden lid and rubber ring, which fits into the flange of the pipe and is held in place by an iron clamp and screw, invented for the purpose by Mr. Fish. It requires but a moment to attach the hose to one of these uprights.

The first season Mr. Fish had his system in operation he made a nice sum out of three acres that year. It turned in hot and dry; he pumped water almost continually for six weeks and kept the ground wet. The farmers who did not irrigate lost their crops by drought. Mr. Fish considers celery about the best paying crop to grow, if one is fixed to irrigate it
